- Current schedule concerns:
 - Option B design work remains as the critical path
 - DRM work is playing catch up after funding cut at end of FY18
- A great deal of work needed in the next 3-4 months
 - Many important decisions will need to be made very soon
- Work ramps down after delivery of ICE draft (2nd draft) on 2/28/19
 - All design work will be done by ICE delivery
 - Editing/writing will begin to be concentrated in fewer people with 3rd draft
- Our focus is moving from design development to report writing and getting the message out
 - More funding to support HabEx talks in FY19 than in prior years
 - STDT members should look for speaking/presenting opportunities in the 2nd, 3rd and 4th quarters of FY19 since workload will be diminishing.
- **Do we need any more STDT face-to-face meetings? If so, what is the meeting purpose and when should we meet?**
